

Using a funnel or a piece of paper made into a funnel fill the bottle with rice/sand. The more you put into the bottle the more difficult it will be to find the items.

Step 5

Cover the cap of the water bottle with glue and screw it on tightly.

You're done! You can make one for each of your kids and they can spend time looking for their items and interchange the bottles. Once your trip is over collect your favorite trinkets and dispose of the bottle and rice/sand.
